## Biodiesel in Generators

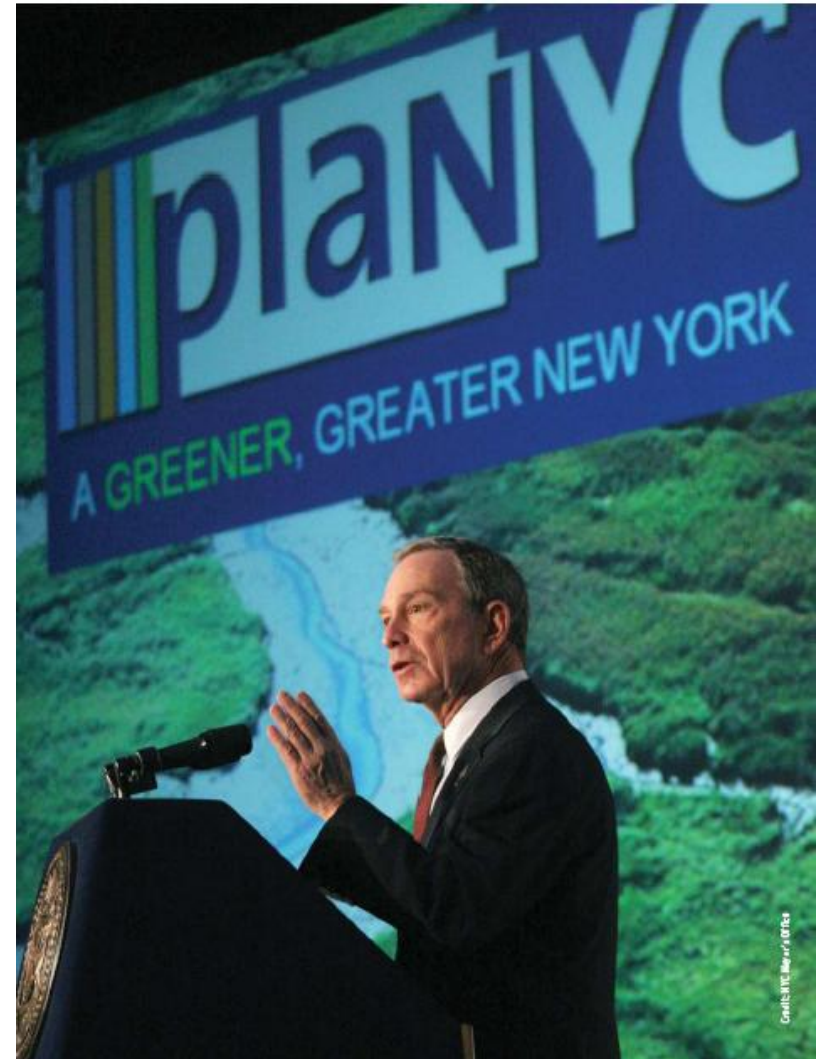

Bronx Community College  
June 9, 2011

# New York City Parks & Recreation

Through PlaNYC, Mayor Bloomberg has challenged New York City to reduce carbon emissions by 30% in total by 2030 and 30% for municipal government by 2017.

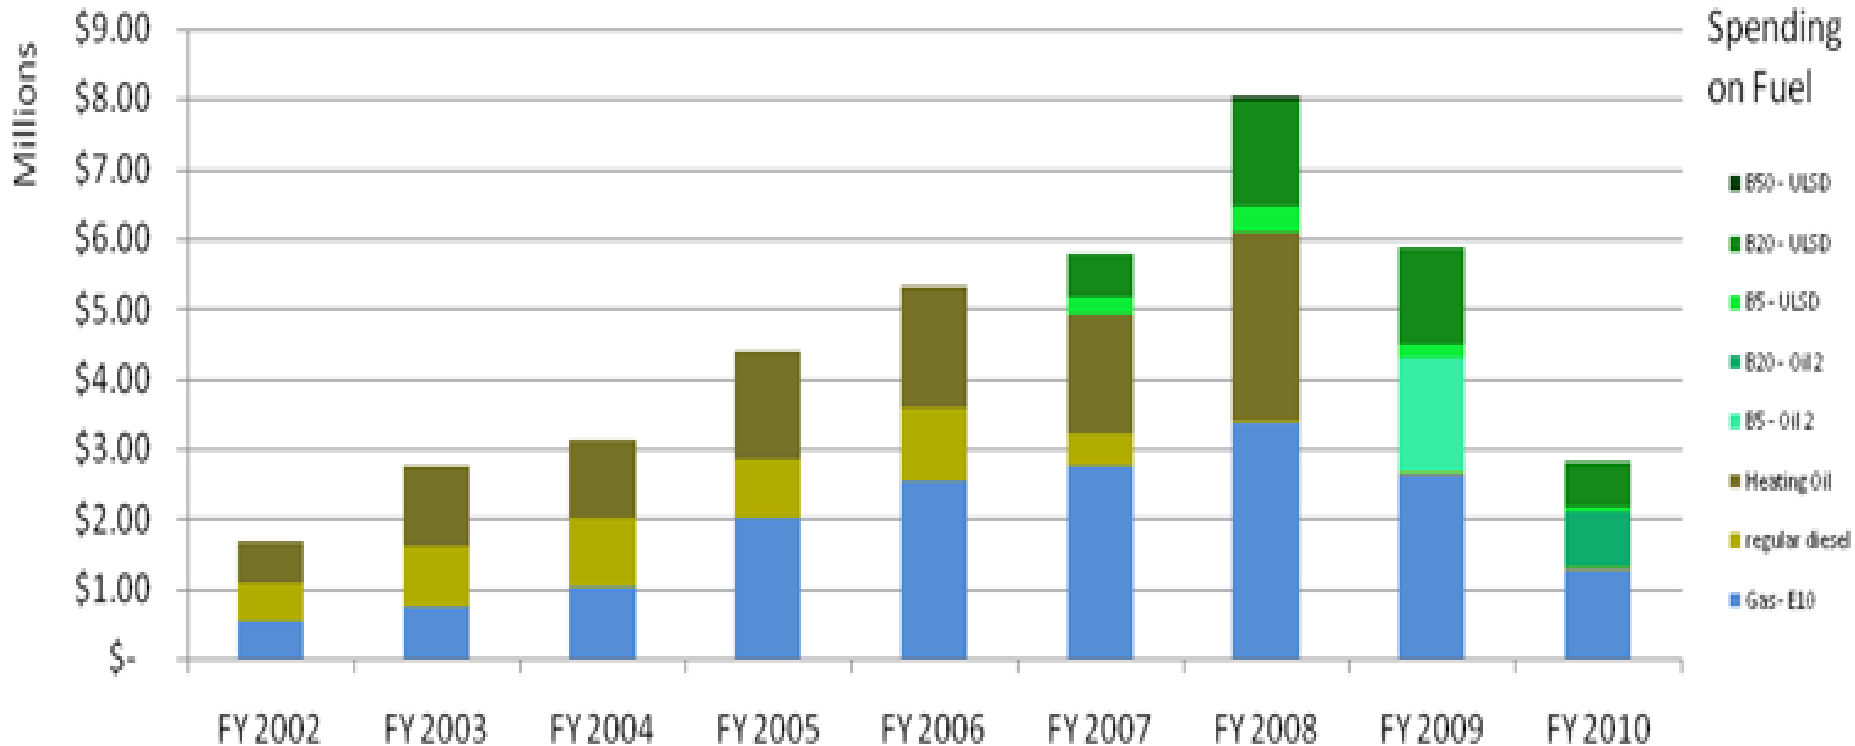

Parks is leading the way on the fleet side. By 2010, over 70% of our fleet will use alternative energy. All diesel units use biodiesel 20 currently year round. We use it for all heating as well.

## The Greening of Parks Fuel

# New York City Parks & Recreation

All 850 diesel units at Parks use biodiesel 20, virgin soybean biodiesel mixed with ultra low sulfur diesel. Our 11 diesel fueling sites dispense only biodiesel.

# New York City Parks & Recreation

Parks has piloted  
biodiesel 100% and  
biodiesel 50%.

We operated  
Orchard Beach on  
B50 in 2008 and  
will pilot it again  
this summer.
